

## INDEX TO VOLUME VII

<b>Afriat, S. N.</b> On the latent vectors and characteristic values of products of pairs of symmetric idempotents . . . . .	76
<b>Allen, H. S.</b> The intersection of the Köthe-Toeplitz maximal matrix rings . . . . .	277
<b>Arscott, F. M.</b> Perturbation solutions of the ellipsoidal wave equation . . . . .	161
<b>Bonsall, F. F., and Reuter, G. E. H.</b> A fixed-point theorem for transition operators in an $(L)$ -space . . . . .	244
<b>Carlitz, L.</b> Solvability of certain equations in a finite field . . . . .	3
<b>Clunie, J.</b> The behaviour of integral functions determined from their Taylor series . . . . .	175
<b>Davies, M. W.</b> A note on Borsuk's antipodal-point theorem . . . . .	293
<b>Dowker, Yael N.</b> On minimal sets in dynamical systems . . . . .	5
<b>Eve, J., and Scoins, H. I.</b> A note on the approximate solution of the equations of Poisson and Laplace by finite-difference methods . . . . .	217
<b>Flett, T. M.</b> On the degree of approximation to a function by the Cesàro means of its Fourier series . . . . .	81
<b>Freeman, J. G.</b> Finsler-Riemann systems . . . . .	100
<b>Gillis, J.</b> Centrally biased discrete random walk . . . . .	144
<b>Gravett, K. A. H.</b> Ordered Abelian groups . . . . .	57
<b>Howarth, J. C.</b> On the real rotation group . . . . .	241
<b>Isbell, J. R.</b> A class of majority games . . . . .	183
<b>Jones, J.</b> On the extension of a theorem of Atkinson's . . . . .	306
<b>Kendall, D. G.</b> Some further pathological examples in the theory of denumerable Markov processes . . . . .	39
<b>Kennedy, P. B.</b> A note on uniformly distributed sequences . . . . .	125
— Fourier series with gaps . . . . .	224
<b>Khan, N. A.</b> The characteristic roots of the product of matrices . . . . .	138
<b>Linden, C. N.</b> The minimum modulus of functions regular and of finite order in the unit circle . . . . .	196
<b>Martin, A. I.</b> Some further work on $L^2$ -solutions of the wave equation . . . . .	280
— On the upper and lower limiting points of the spectrum of a partial differential equation . . . . .	310
<b>Mauldon, J. G.</b> Characterizing properties of statistical distributions . . . . .	155
<b>Maximon, L. C.</b> Two expansions of the Bessel function $K_n(z)$ in terms of $I_n(z)$ . . . . .	79

<b>Moran, P. A. P.</b> A probability theory of a dam with a continuous release . . . . .	130
<b>Paechter, G. F.</b> The groups $\pi_r(V_{n,m})(I)$ . . . . .	249
<b>Parsons, D. H.</b> Singular systems of two differential equations . . . . .	287
<b>Patterson, E. M.</b> On the generators of nilpotent linear algebras . . . . .	17
<b>Petersen, G. M.</b> 'Almost convergence' and uniformly distributed sequences . . . . .	188
<b>Powderley, Mary, and Tong, H.</b> On orbital topologies . . . . .	1
<b>Rahman, Q. I.</b> On the lower order of entire functions defined by Dirichlet series . . . . .	96
— On means of entire functions . . . . .	192
<b>Rajagopal, C. T.</b> A note on the oscillation of Riesz, Euler, and Ingham means . . . . .	64
<b>Reuter, G. E. H.,</b> see <b>Bonsall, F. F.</b>	
<b>Rutovitz, D.</b> On the $L_p$ -convergence of eigenfunction expansions . . . . .	24
<b>Sandham, H. F.</b> A square and a product of hypergeometric functions . . . . .	153
<b>Schwarz, Št.</b> On the reducibility of polynomials over a finite field . . . . .	110
<b>Scoins, H. I.,</b> see <b>Eve, J.</b>	
<b>Shimrat, M.</b> Decomposition spaces and separation properties . . . . .	128
<b>Tong, H.,</b> see <b>Powderley, Mary.</b>	
<b>Verblunsky, S.</b> On an expansion in exponential series . . . . .	231
<b>Whittle, P.</b> Some combinatorial results for matrix powers . . . . .	316
<b>Willmore, T. J.</b> Connexions for systems of parallel distributions . . . . .	269
<b>Wintner, A.</b> On the integrability of a class of non-oscillatory differential equations by means of Laplace transforms . . . . .	301
